

COMPANY PROFILE

Our company

Enecon is an electrical contractor company, active in the field of electrical services for the management of building installations, automation and industrial installations reconstruction of business premises, renewable energy sources and energy savings.

Our story

We are a relatively newly established company, the result of a long-term collaboration of three engineers (Mechanical, Electrical and Environmental), with a philosophy and culture of constantly investing in new technologies, in order to offer its customers efficient and flexible solutions, at the lowest possible cost.

We aim at designing high quality and performance projects, with the core of establishing stable and long-term relationships of mutual appreciation and trust with our customers.

Our clients include leading Greek and multinational companies, operating in office buildings, shopping malls, store chains, industrial facilities, as well as hotel and residential complexes. During the first months of 2024 we have also installed/contracted 50 MW of solar installations in building shells and fields.

Our approach

In the effort to continuously improve our services, we make continuous investments, in new technology equipment, we support the continuous training of the staff, we maintain two-way communication with our customers and we respond immediately to their requests.

Our principles

We monitor and harmonize with any new case law or directives of the European Union, we insist on the observance of the rules of safety and hygiene in the workplace and we are particularly aware of energy policy issues and environmental protection

The technical approach to each project we undertake concerns first the study of the operation of each company and then the composition of proposals, in order to release valuable resources that can then be used by companies and environmental protection.

Our services

"Our goal at Enecon is the constant evolution, in order to meet the growing needs of our customers in the modern business environment. "

We offer specialized services and solutions for electrical constructions, renovations of buildings, offices, hotels, shops and other business premises, undertaking the delivery of complex and demanding projects in terms of specifications and delivery time, ready for use by the customer.

Based on the specific needs of each customer and at the same time having executives. With extensive experience and know-how in construction, the company is able to implement high-demand electrical projects distinguished by the use of state-of-the-art technologies and significant resource savings.

Depending on the various specifications, requirements and budget of each project, we cover the equipment of business premises, using personalized solutions or tried and tested products of Greek and international companies.

At Enecon we specialize in the application of advanced technological solutions with a goal and result reducing energy consumption and maintenance costs of the installation. At the same time, we provide consulting and training services, as well as automated infrastructure control systems.
